

CONTENTS

1. INTRODUCTION.....1

1.1 T cell activation.....1

1.2 Actin cytoskeleton.....7

1.3 Lipid microdomains in cell surface membranes.....10

1.4 Forms and functions of CD44.....11

1.4.1 Structure of CD44.....11

1.4.2 Functions of CD44 in the immune system.....14

1.5 Aim of the study.....17

2. MATERIALS AND METHODS.....18

2.1 MATERIALS.....18

2.1.1 General chemicals and materials.....18

2.1.2 Inhibitors.....19

2.1.3 Radiochemicals.....20

2.1.4 Expression vectors.....20

2.1.5 Peptides.....20

2.1.6 Antibodies.....21

2.1.7 CD44 receptor globulin.....22

2.1.8 Experimental animals.....22

2.1.9 Cell lines.....23

2.2 METHODS.....24

2.2.1 Cell culture.....24

2.2.2 Lymphocyte preparation and fractionation.....24

2.2.3 Stimulation of cells.....25

2.2.4 Antibody purification.....26

2.2.5 Proliferation assay.....27

2.2.6 Cytokine ELISA.....27

2.2.7 Immunofluorescence staining for flow cytometry.....28

2.2.8 Determination of apoptosis.....29

2.2.9 Biosynthetic labeling of cellular proteins.....30

2.2.10 Immunoprecipitation.....30

2.2.11 Immune complex kinase assay and reprecipitation.....31

2.2.12 Purification of GEM fractions.....32

2.2.13 SDS-polyacrylamide gel electrophoresis (SDS-PAGE).....32

2.2.14 Western blotting.....33

2.2.15 Dot-blot immunoassay.....34

2.2.16 Immunofluorescence microscopy.....35

2.2.17 Transient transfection.....36

3. RESULTS.....37

3.1 Inhibition of IL-2 secretion by a CD44 receptor globulin and induction of T cell proliferation by cross-linking of CD44.....37

3.2 Induction of apoptosis by cross-linking of CD44.....46

3.3 CD44 is costimulatory for CD3-induced signal transduction events.....54

3.3.1 Activation of both ERK and JNK pathways after coligation of CD44 with CD3.....55

3.3.2 Cross-linking of CD44 enhances early CD3-induced signaling events.....56

3.4 CD44 is associated with src-family protein tyrosine kinases.....64

3.5 Redistribution of src family kinases into glycolipid-enriched microdomains (GEMs) upon cross-linking of CD44.....67

3.6 CD44 engagement induces cytoskeletal rearrangements in T cells.....71

4. DISCUSSION.....81

4.1 Costimulatory function of CD44 in T cell proliferation and apoptosis.....82

4.2 Costimulatory function of CD44 on CD3-induced signal transduction.....84

4.2.1 Costimulatory function of CD44 on CD3-induced ERK and JNK activation.....84

4.2.2 Costimulatory activity of CD44 acts on TCR-proximal signaling events.....85

4.3 Mechanism of CD44-mediated costimulatory activity.....89

4.3.1 CD44 functioning as an adhesion molecule.....89

4.3.2 CD44 contributes to cytoskeletal rearrangements.....90

4.3.3 Recruitment of src-family protein tyrosine kinases by CD44.....94

4.3.4
