

- Legend**
- Topography**
- seasonal stream
  - contour line
- Geomorphodynamics and Geomorphogenesis**
- rill erosion
  - sheet wash
  - formation of evaporates
  - lateral erosion
- Geomorphography & Geomorphometry**
- strongly concave, r=6-300m
  - slightly concave, r=300-600m
  - small saucer-shaped drainageway, <25m
  - step: H: 0-1m, B: 1-5m
  - steep slope: H: 1-5m, B: 5-10m
  - saucer-shaped valley, 25-100m
  - flat-floored valley, 25-100m
  - v-shaped valley with flat floor, 25-100m
  - earth dam
- Geomorphostructure**
- fault - location concealed
  - anthropogenic accumulation
  - conglomerate
  - silty loam
  - sand
  - grit
  - gravels
- Changes of geomorphic structures and processes**
- change of structure - location accurate
  - change of structure - location inferred
  - system contact - change of process & structure
  - system contact - location accurate
  - gradational system contact
  - gradational change of process
  - gradational change of structure
- Areas of geomorphic structures and processes**
- fluvial
  - fluvial, area of Holocene alluvial fan activity and alluvial plains
  - fluvial, recent flood plains and low terraces
- denudational, footslopes**
- recent denudational, alluvial apron
  - subfossil denudational, alluvial apron
  - fossil denudational, alluvial apron
  - polygenetic, footslope denudation and neotectonic faulting
  - polygenetic, eroded low terraces and neotectonic faulting
- Shading (derived from slope [°])**
- anthropogenic
  - landforms due to human impact
- High : 90  
Low : 0
- Basemap:  
Landsat ETM+, Aquisition 03-04/2010  
Landsat OLI, Aquisition n.a. < 2010  
Spot Elevation 30, Aquisition n.a. < 2010  
Quickbird2, Bing Maps Access 10/2011  
ASTER GDEM, Version 1 2000-2008, Version2 2000-2010
