

Contents

1. Introduction 1

1.1 Programmed Cell Death 1

1.2 Caspases 2

 Caspase family and functional subfamilies 3

 Structural features of caspases 4

 Quaternary structure and activation of caspases 6

 Catalytic mechanism of caspases 8

 Substrate specificities of caspases 10

 Caspase substrates during apoptosis 11

 Natural inhibitors of caspases as regulators 14

 Caspase Inhibitors as a therapeutic approach 16

1.3 The Bcl-2 Protein Family 17

 Mitochondria and the functions of Bcl-2 family 18

1.4 Caspase Cascades in Apoptosis 18

 Caspase cascades in receptor mediated apoptosis 19

 Death receptors and mitochondria 20

 Caspase cascades in stress induced apoptosis 20

 ER stress induced pathway of apoptosis 22

1.5 Cell Death of AKR 2B-Mouse Fibroblasts 23

1.6 The Aim of The Study 24

2 Materials and Solutions 26

Abreviations 26

2.1 Enzyme and Kits 27

 2.1.1 Restrictionendonucleases 27

 2.1.2 DNA-modifying enzyme and kits 27

 2.1.3 Other enzymes 27

2.2 Plasmids 28

 2.2.1 Plasmid-constructs 28

2.3 Oligonucleotides 29

2.4 Antibodies 30

2.5 Inhibitors und Substrates For Caspases 30

2.6 Molecularweight markers 31

 2.6.1 Molecularweight markers for proteins 31

 2.6.2 Molecularweight markers for DNA 31

2.7 Sequence Informations 31

2.8 Chemicals 32

2.9 Equipments 34

2.10 Other materials and Membranes 35

3 Methods 36

3.1 Vertebrate Cell Culture Methods 36

 3.1.1 Sterilization of the equipments and solutions 36

 3.1.2 Cell culture medias and buffers 36

 3.1.3 Cultivation of AKR-2B mouse fibroblasts 37

 3.1.4 Cultivation of THP.1 cells 37

 3.1.5 Cell counting by Casy1 37

 3.1.6 Cryoconservation 37

3.1.7 Induction of apoptosis.....	37
3.1.8 Transfection of AKR-2B mouse fibroblasts by electroporation	38
3.1.9 Preparation of cytosolic extracts and total cell lysates.....	39
3.1.10 Immunostaining of cells for fluorescence microscopy.....	39
3.1.11 Fluorescence microscopy.....	40
3.2 Working with <i>E. coli</i>	41
Growth, Maintenance and Preservation of Bacterial Strains.....	41
3.2.1 Growth of bacterias for plasmid preparation	41
3.2.2 Growth and induction of bacterias for expression of a target gene.....	41
3.2.3 Storage of bacterial strains.....	42
3.2.4 Transformation of <i>E.coli</i> -cells	43
3.3 Proteinchemistry Methods	43
3.3.1 Bradford protein determination.....	43
3.3.2 Redingbaugh protein determination.....	43
3.3.3 SDS-Polyacrylamid-Gelelectrophoresis (from Laemmli).....	44
3.3.3.1 Minigels	44
3.3.3.2 Midigel for 2D-Gelelektrophoresis.....	44
3.3.4 2D-Gelelektrophoresis	45
3.3.5 Coomassie blue staining	47
3.3.6 Western and affinity blotting	47
3.3.7 Activity assay of caspases	50
3.3.8 Chromatography	51
3.3.8.1 Gel filtration chrmatography.....	51
3.3.8.2 Purification of recombinant target proteins by immobilized metal affinity chromatography	52
3.4 Isolation and Purification of Nucleicacids	54
3.4.1 Standard methods of purification of DNA.....	54
3.4.2 Plasmid preparation from <i>E. coli</i> with LiCl.....	55
3.5 Analysis of Nucleicacids	56
3.5.1 Seperation of DNA by agarose gel electrophoresis	56
3.5.2 DNA-Sequencing	57
3.5.3 Quantitation of nucleicacids.....	58
3.6 In vitro Amplification of DNA by Polymerase Chain Reaction	59
3.6.1 PCR standart protocol	59
3.6.2 PCR protocol for Pfu <i>taq</i> polmerase	60
3.6.3 PCR protocol for Hot start <i>taq</i> polymerase.....	61
3.6.4 Dovetail PCR product cloning.....	62
3.7. Site-directed Mutagenesis by PCR	63
3.7.1 Site-directed mutagenesis by using two internal mutagenesis primers	63
3.6.2 Site-directed mutagenesis by overlap extension	63
3.8 Enzymatic Modification of Nucleicacids	64
3.8.1 Digestion of DNA with restrictionsendonucleases	64
3.8.2 5' Dephosphorylation of DNA	64
3.8.3 Ligation of DNA-fragments.....	65
4 Results	66
4.1. Expression and Purification of Recombinant Mouse Caspase-3 Protein	66
4.1.1 Clonning of caspase-3 is into the expression vector pET21b.....	66
4.1.2 Expression and purification of caspase-3.....	68
4.1.3 Generation of mt (K ₂₅ E) mcaspase-3 by site directed mutagenesis	72
4.1.4 Expression and purification of mt K ₂₅ E mcaspase-3 protein	73
4.1.5 Determination of K _m and V _{max} values of the recombinant wild type and mt mt K ₂₅ mcaspase-3 proteins for the substrates DEVD.pNA and VEID.pNA.....	77
4.2 The Main Active Executioner of AKR-2B Mouse Fibroblasts	78
4.2.1 Caspase-3 is activated as the main executioner caspase during cell death of AKR-2B fibroblasts	78
4.2.1.1. Cell death induced by serum deprivation.....	78
4.2.1.2. Cell death induced by Anisomycin treatment	80
4.2.2 Caspase-7 protein is not expressed in AKR-2B fibroblasts.....	82

4.3 Analysis of The Activation of Caspase-3 During Cell Death of AKR-2B Fibroblasts.....	83
4.3.1 Caspase-3 is activated in complexes in response to serum starvation	83
4.3.2 Caspase-3 activating complexes devoid of Apaf-1, in response to serum starvation.....	89
4.3.2 Analysis of involvement of complex formation in caspase activation during cell death of AKR-2B cells induced by Anisomycin	92
4.4 <i>In vitro</i> reconstitution of Caspase Activating Complexes.....	95
4.4.1 Reconstitution of Apaf-1 containing apoptosome complexes by the addition of cytochrome c, dATP and MgCl ₂	95
4.4.2 <i>In vitro</i> reconstitution of the complexes by the addition of recombinant caspase-3	96
4.5 Localization of Active and Procaspase-3 During Apoptosis in AKR-2B Fibroblasts.....	98
4.5.1 Active caspase-3 is localized in the membrane blebs	98
4.5.2 Procaspase-3 is localized in the cytoplasm in AKR-2B cells	99
4.6 Examination of The Activation of Caspase-12 During Apoptosis in AKR-2B Fibroblasts	101
4.6.1 Caspase-12 is activated in response to serum deprivation	102
4.6.2 Caspase-12 is activated by Anisomycin treatment	102
4.6.3 Active caspase-12 is released as uncomplexed free enzyme during apoptosis	103
4.6.4 The role of ER stress in the activation of caspase-12	104
4.6.5 Activation of caspase-12 by recombinant caspase-3 or Cytochrom c/dATP	106
5. Discussion	108
6. Summary	122
6. Zusammenfassung	124
